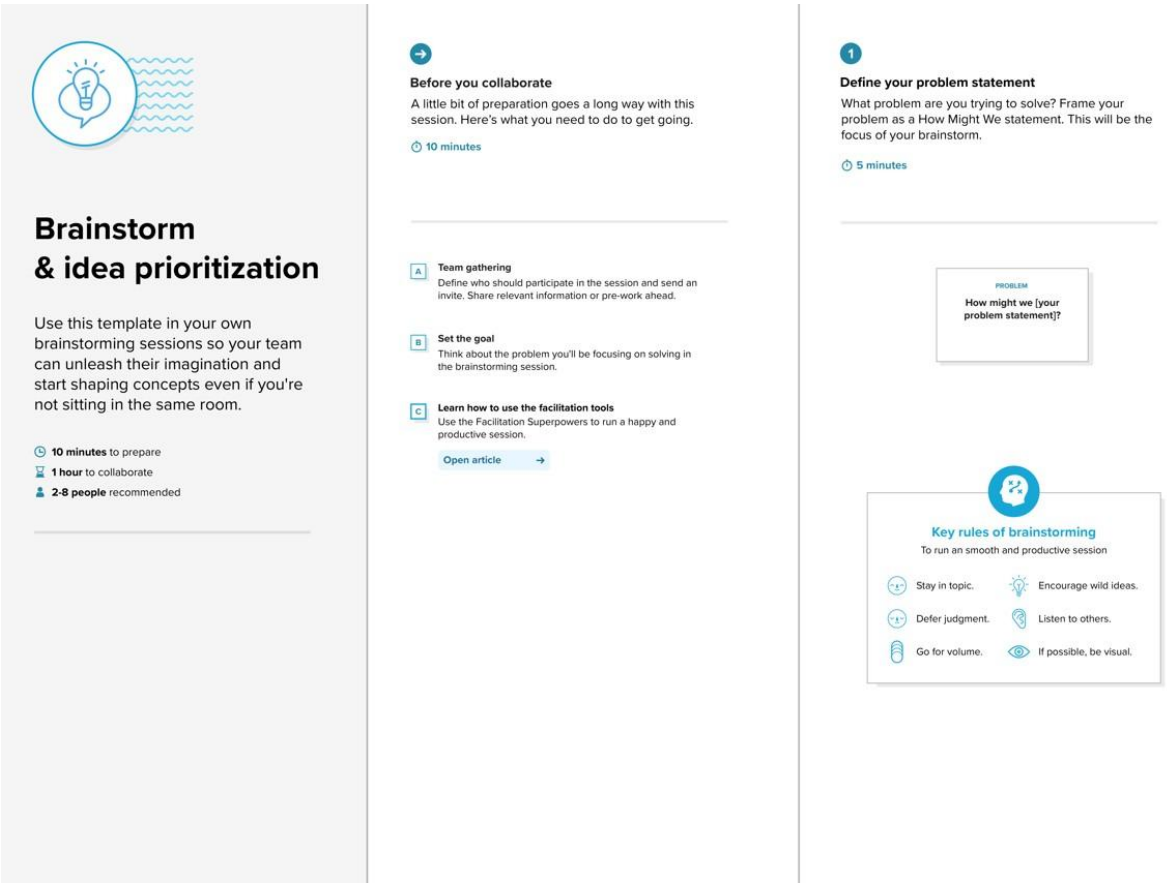
Project Name	Housing Market Trends: Analysis of Sales Price and Features Using Tableau.
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement :-

The project team was formed by bringing together members with complementary skills to ensure effective execution of the project. Each team member contributed based on their area of interest and technical strengths.

Problem Statement:-

To analyze housing market trends by visualizing sales prices and property features using Tableau in order to identify key factors influencing property prices and market behavior.



Step-2: Brainstorm, Idea Listing and Grouping :-

After team formation, a structured brainstorming session was conducted to generate multiple project ideas related to data analytics and visualization. The goal was to explore real-world problems that could be effectively analyzed using available datasets and Tableau dashboards.

During brainstorming, all ideas were encouraged without immediate evaluation to promote creativity and innovation. Team members contributed ideas based on practical relevance, data availability, and visualization potential.

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
